Bobby Martin

Software Engineer

Portland, OR | linkedin.com/in/bmartin87 | robert.martin.619@gmail.com | 916-477-0005

I'm a Software Engineer with 6+ years of industry experience and an eye for modern design. I'm open to a full-time role that focuses on quality over speed and promotes learning and mentorship.

Work Experience

CUNA Mutual Group

Software Developer III | Nov 2020 - Current

- Help build and maintain consumer-facing front-end applications built with React, Redux with Redux Sagas/React Context API, TypeScript, and styled-components.
- Work with our existing backend services built with Node, Express, and TypeScript.
- Contribute to our Agile team structure by maintaining assigned sprint/backlog items using Azure DevOps
- Promote better code stewardship by contributing to peer-review to ensure code is scalable and reusable wherever possible.

Mixmax Inc.

UI Engineer | May 2019 - Jul 2020

- Built new React components and views for our customer-facing application and marketing website using React, Gatsby, styled-system, and Netlify that has thousands of concurrent users per day.
- Helped implement new features for our Salesforce integration using Backbone, Node, and Express
- Code owner for the companies marketing website
- Participated in weekly JIRA sprints and collaborated with full-stack engineers and product designers to solve complex problems.

Amplified by Design

Front End Developer | Aug 2018 - May 2019

- Built a React application using Redux as state-management for a non-profit helping the local houseless population.
- Rebuilt the company website using Gatsby and Craft creating better visibility on company principles and values on design.
- Worked with AWS services such as Lambda, EC2, S3, API Gateway, CodePipeline, and Route 53
